How has China's 'Belt & Road' Initiative changed the world?

Since the proposal of the "Belt and Road" initiative (BRI) in 2013, China's renewable energy investments in the countries along the route have shown rapid growth and diversification. These investments have shifted from initial product exports and engineering contracts to deeper equity investments and financing cooperation.

How much is China engaged in the Belt & Road Initiative?

Preliminary data on Chinese engagement through financial investments and contractual cooperation for 2024 in the 149 countries of the Belt and Road Initiative show about 340 deals worth USD121.8 billion. This compares to USD 92.3 billion BRI engagement in all of 2023 - an increase of 31%.

Is energy the bedrock of the Belt & Road?

In short, energy, both fossil and renewable, remains the bedrock of the BRI, accounting for about 35% of all Belt and Road expenditures this year. Closely intertwined with energy is the boom in metals and mining.

Does the Belt & Road Initiative affect electrification levels?

Learn more. Electrification is crucial for achieving global net zero emissions and reducing energy poverty, particularly in developing countries involved in the Belt and Road Initiative (BRI). This study uses the difference-in-differences method to examine the BRI's impact on electrification levels in 118 countries from 2009 to 2020.

Abstract Electrification is crucial for achieving global net zero emissions and reducing energy poverty, particularly in developing countries involved in the Belt and Road Initiative (BRI). ...
