On July 16, 2025, Morowali Industrial Park in Sulawesi Province, Indonesia welcomed a milestone clean energy project - a 200MW photovoltaic power station with an 80MWh energy storage system.

Learn how off-grid solar and battery storage provide efficient, low-carbon power for industries and remote areas.

Off-grid solar system with lithium batteries for any kind of buildings, anywhere in Indonesia. We can help make it more affordable!

These solar-plus-storage minigrids are set to be installed in 80,000 villages across Indonesia and will be managed and operated by village cooperative Merah Putih. The initiative also ...

Operated by the village cooperative Merah Putih, these solar-plus-storage mini grids aim to provide affordable, reliable power while reducing dependence on costly diesel generators.

China-headquartered battery manufacturer and energy storage solutions provider Elong Power announced this week (8 July) that it has entered a strategic cooperation agreement with ...

It is suitable for the daily demand of electricity in areas lacking connection to a central power grid. It can be integrated with power grid or generator to form a stable, comprehensive power supply system and ...

We have seen an immediate reduction in our energy bills and a change in our power consumption patterns since we installed the PVMARS off-grid solar power system.

We've successfully implemented a 200kW off-grid solar project in Sichuan, aimed at resolving the water access challenges faced by residents in mountainous regions. Our engineers poured their expertise ...

200kW Indonesian Off-Grid Solar Storage Unit for Mountainous Areas

These systems consist of solar panels, battery storage units, and inverters that convert solar power into usable electricity. They are particularly suited for Indonesia's remote islands, where ...
