Are 20kW solar power systems a good investment?

20kW solar power systems are becoming an increasingly worthwhile and attractive investment for small to medium businesses (or households with very large energy consumption) across Australia, with payback periods in the 3-5 year range in most parts of the country.

What is a 20kW Solar System?

The 20kW Solar system is a fairly big generation unit, heavily suited towards commercial establishments; It can be suitable for residential clients as well provided you have roof space and consistently high power usage patterns. The 20kW solar system would be generating an average of 75kWh of power daily.

How much does a 20kW Solar System cost in Sydney?

These are discussed below: The 20kW solar system costs we have outlined above (around \$15,000-\$20,000 inc. GST in Sydney as of the end of 2023) is an estimate of the price for installs without significant extras for complications.

How much does a 20kW Solar System cost?

According to data from Solar Choice's installer network database, a fully installed 20kW system will cost roughly \$15,000 - \$22,000 as of August 2024. These figures include the up-front 'discount'/incentive available under the federal government's Renewable Energy Target for systems under 100kW in output capacity, as well as GST.

The EK indoor photovoltaic energy storage cabinet series is an integrated photovoltaic energy storage device designed for communication base stations, smart cities and other scenarios, providing a ...
