From developing our proprietary High-Speed Electrode Stacking System to delivering full-scale energy storage manufacturing lines, DW Fritz brings deep expertise in building battery cells, modules, and ...

Before changing the model, call up the test jump coordinate program, carry out the first piece test OK, and proceed to the production mode after the model changing.

This automated assembly line consists of three main sections: cell sorting, module line, and PACK assembly. It includes processes such as cell sorting, OCV testing, laser engraving, polarity detection, ...

Contact us today to learn how our battery assembly automation solutions can transform your production line and deliver the performance you need in today's fast-paced market.

Discover the key features of a modern battery pack assembly line and how expert design and automation can boost performance, flexibility and output.

Our automated assembly redefines efficiency and precision in Energy Storage System (ESS) assembly. Designed for high-volume production, it ensures exceptional throughput and superior yield rates ...

This automatic PACK production line supports the manufacturing of a wide range of cell module specifications and models. With a centralized control panel, it facilitates rapid program ...

We can help you design and build systems to automate the production of battery energy storage systems (BESS) that will increase production and safety while reducing costs.

The energy storage drawer cabinet production line adopts double-speed chain conveying lines, roller conveying lines and AGVs (automatic guided transport vehicles) to reduce material handling blind ...

Automated production line for flow battery energy storage cabinet

The AGV flexible logistics system is used to achieve automatic assembly process of energy storage cabinets, rapidly improving product production efficiency and stability.
