From smarter energy management to enhanced safety features, lithium batteries with advanced BMS are revolutionizing how Ljubljana businesses and households consume power.

Latest Trends in Battery Technology o Solid-State Batteries: Batteries using solid electrolytes instead of liquid ones. They promise higher energy density, increased safety (no risk of electrolyte leakage), ...

Battery safety standards are constantly being updated and optimized, because current tests cannot fully guarantee their safety in practical applications. This is still a very serious problem, ...

"Hopefully, the fully operational smart battery will see the light of day within a ten-year period", says Professor Robert Dominko. Integration of smart functionalities will enhance the lifetime and safety of ...

battery safety Conferences in June 2025 in Ljubljana is for the researchers, scientists, scholars, engineers, academic, scientific and university practitioners to present research activities that might ...

Owing to increasing demand for low-cost energy storage with secure material supply chains, the battery community is approaching a pivotal shift beyond conventional lithium-ion (Li-ion) ...

Solar container lithium battery safety training Web-based: Remote training that covers battery basics, hazards, transport and disposal concerns, and air monitoring (coming soon).

Within the framework of the project, 6 sodium-ion battery prototypes will be tested in 3 multi-scale Business Scenarios to provide solid evidence on the competitiveness of the technology in 3 real ...

Portable energy storage battery technology is revolutionizing how Ljubljana residents and businesses manage power needs. From outdoor adventures to emergency backup systems, these compact ...

Currently, the battery market is dominated by lithium-ion chemistries, however, conventional Li-ion batteries

Battery safety Ijubljana

with liquid electrolytes are reaching their performance limits in terms of energy density and ...
