-----

Rawsun Mobile Energy Storage Charging Cabinet is a highly integrated, flexibly deployable outdoor energy storage system designed for commercial and industrial applications and outdoor operations.

Explore how Battery Energy Storage Systems (BESS) and Bidirectional Charging (BDC) are transforming energy storage, improving efficiency, and maximizing renewable energy.

The technology enables charging the batteries of electric vehicles and transferring the stored energy back to the stationary storage system in the building or to the grid when needed.

Often combined with solar or wind power Bidirectional AC-DC converter and bidirectional DC-DC converter to control energy flow

Tired of limited power access? The RS100's bidirectional energy conversion changes the game: Charge via 380V AC grid or EV DC charging piles...more

In contrast to stationary storage and generation, which must stay at a selected site, bidirectional EVs employed as mobile storage can be mobilized to a site prior to planned outages or ...

Bidirectional electric vehicles (EV) employed as mobile battery storage can add resilience benefits and demand-response capabilities to a site's building infrastructure.

Secure your off-grid power needs with our outdoor cabinet energy storage system. Designed for resilience, it offers high-capacity energy storage in a weather-resistant cabinet.

Multiple cabinets can be connected in parallel to realize the expansion of the energy storage system. The local control screen enables diverse functions, including system operation monitoring, energy ...

# **Bidirectional charging of outdoor energy storage cabinets for field operations**

BX Energy Systems delivers modular commercial and industrial battery energy storage systems designed for behind-the-meter and grid-connected applications.
