Are there solar panels in Belgium?

An increasing number of households in Belgium has installed solar panels or will be going to in the near future. How do you choose the best solar panels and what things do you need to keep in mind? CallMePower explains everything you need to know about solar panels in Belgium. [How To Install Solar Panels in Belgium?](#)

How much does a solar panel installation cost in Brussels?

On average, the price of a solar panel installation in Brussels is between 5,000 and 15,000 euros. This price usually includes the solar panels, the inverter, the battery for solar panels, and the installation. The Brussels-Capital Region grants green certificates to encourage individuals and businesses to invest in solar panels.

Why should you install solar panels in Brussels?

The main advantage of installing solar panels in Brussels lies in the green certificate system. Each green certificate is equivalent to the avoidance of 217 kg of CO₂ emissions and can be sold to an energy provider or intermediary.

Can I install solar panels myself in Belgium?

There are several companies active in Belgium that install solar panels. There are no conditions specifically for the installation of solar panels, so it is possible to install the solar panels yourself. However, it is advisable to have these works carried out by a recognized technician who can also carry out an inspection immediately.
