---

Due to delays in ongoing repair projects and regulatory inconsistencies, Bulgaria uses only one-third of its large, pumped-storage hydro power plants (HPPs) and even less of smaller run-of-the ...

The latest white paper, prepared by Fluence in collaboration with APSTE, examines the current state of the Bulgarian energy market and the potential for energy storage applications to revolutionise the ...

As Europe races toward climate neutrality, Bulgaria's surge in storage capacity signals a shift not only in national priorities but also in regional energy dynamics.

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage into ...

New investments in renewable energy generation, primarily solar photovoltaics (PV) in Bulgaria and neighboring countries, drove down power prices during periods of high supply.

Bulgaria now has around 500 MW of battery energy storage in operation, equal to roughly 1,300 MWh of capacity, the head of the national grid operator said this week.

At EVN Bulgaria, we recognise battery energy storage as a cornerstone of future energy markets. Our strategic focus is on delivering high-value services that go beyond technology: ...

The tender was launched last year, aiming to significantly increase the share of renewable energy, mainly wind and solar, in the country's energy mix. It would also contribute to ...

Transformation of AES Galabovo into a large-scale energy storage facility using proven technology implemented in concentrated solar power plants (CSP) using molten salts

# Bulgaria energy storage power generation

storage is hindering Bulgaria in the development of an energy storage market. Furthermore, Bulgaria's energy legislation and grid codes have been historically written with thermal plants in mind, ...
