China Wind Power News: On May 13, with the precise docking of the front wind wheel and the nacelle, the world's first tandem double-wind wheel wind turbine "Sairui" independently ...

Chinese engineers have created a prototype floating wind turbine that they say has broken power generation records -- potentially ushering in a new generation of renewable power...

With a single-unit capacity of 17 megawatts (MW) and a rotor diameter of 262 meters - the largest in the world - the rollout of the equipment marks a new breakthrough in China's offshore wind...

BEIJING -- China has achieved a major breakthrough in clean energy technology with the rollout of the world's most powerful direct-drive floating wind turbine.

The unveiling took place in Fuqing, Fujian Province, East China, and was reported by Xinhua News Agency on Thursday. The turbine boasts a single-unit capacity of 17 megawatts (MW) ...

The failure of the dual rotor wind turbine was a setback for the Huaneng Group and the Chinese wind power industry, but it was also a valuable lesson for the development of renewable ...

The world's most powerful direct-drive floating offshore wind turbine -- with the largest rotor diameter -- jointly developed by China Huaneng Group Co., Ltd. (China Huaneng) and ...

China Huaneng is one of the largest state-owned power generation companies in China, known for its leading position with a clean energy portfolio covering gas, hydro and wind power generation.

Engineered for extreme conditions, it can withstand massive waves over 24 meters high and endure ferocious typhoons up to level 17 with winds of up to 209 kilometers per hour.
