It is the largest tower-type solar thermal plant among China's first batch of demonstration power station projects in deserts, Gobi and barren lands commissioned this year.

BEIJING, Nov. 5 (Xinhua) -- China achieved a new milestone in renewable energy by connecting its largest standalone solar power station built in a coal mining subsidence zone to the grid. It started ...

A solar power project in the Gobi Desert has moved the needle on the size and scope of global photovoltaic installations, aided by innovation in equipment and construction.

The 100MW molten-salt solar thermal power plant, also called the 'super mirror power plant' with its more than 12,000 heliostats, sparkles in the Gobi Desert in Dunhuang, northwest China's ...

The massive growth in wind and solar begs the question: why is China still building coal power plants and, by most analyses, way more than it actually needs? The answer is complicated.

These millions of solar panels are a common sight in the outskirts of Yangquan City in north China's Shanxi Province. No one would have guessed these areas used to be sinking lands, destroyed and ...

In the Chinese city of Datong, located in Shanxi province, areas once affected by coal mining are now littered with a huge number of solar panels.

China's installations of wind and solar in May are enough to generate as much electricity as Poland, as the world's second-biggest economy breaks further records with its rapid buildup of...

China has unveiled the world's first dual-tower solar thermal power station in the Gobi Desert, using 27,000 mirrors to generate renewable energy round the clock, a landmark in clean ...
