Does China heavy machinery build power plants in Cambodia?

Over the past decade, China Heavy Machinery has constructed several large-scale power engineering projects in Cambodia, including the operational Tatay River Hydropower Station and the Upper Tatay Hydropower Station, which began construction in late 2022.

What is China's pumped storage project?

The pumped storage project will feature four 250-megawatt turbines, achieving a total installed capacity of one gigawatt, with completion expected within five years. This large-scale civil infrastructure project aims to achieve win-win cooperation between China and Cambodia, per the firm.

What is the internal rate of return of Tatai hydroelectric power plant?

The internal rate of return is projected to be no less than 8 percent. The hydroelectric power plant, which pumps water between two reservoirs at different elevations, is located three kilometers upstream from the dam of the Upper Tatai Hydropower Station currently under construction by the same company.
