-----

This new solar installation features approximately 160,000 photovoltaic panels and boasts an installed capacity of 99 MW, which will enhance the region's contribution to sustainable ...

Croatia crossed the 1 GW milestone in May 2025 and, if current trends persist, could reach 1,290 MW by December 2025. The self-supply sector, particularly households and public ...

Croatia's state-owned energy company, Hrvatska elektroprivreda (HEP), is set to construct 90 rooftop solar power plants by 2026. With a total capacity of 5.3 MW, these plants will be built on ...

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. The expansion is part of the country's broader ...

Discover how Croatia's solar energy boom, powered by advanced photovoltaic panels and battery storage systems, is reshaping its renewable energy landscape. Learn about market trends, ...

Starting January 1, 2026, Croatia will introduce a major change for new solar energy users -- ending the current generous net metering system and replacing it with a new net billing model.

Croatia installed 397.1 MW of solar in 2024, according to figures from RES Croatia. The figure is an increase on the 238.7 MW of solar that were installed in 2023.

With these potentials, Croatia could become one of the most significant producers of solar energy in the EU. The government plans to install 2500 megawatts of new photovoltaic power by 2030. ...

Today eight out of 10 requests for energy approval are for solar power. The ministry expects the total would reach 8 GW by the end of the year. He stressed there are no more locations ...

By the end of 2024, Croatia had reached 3.8 GW of installed renewable energy capacity, with solar energy

# Croatia new energy solar panels

doubling its figures in one year. By 2025, photovoltaic power is expected to exceed ...
