What is a folding container?

A folding container is a resin-made box that can be compactly folded when not in use. Folding reduces the size to about 1/3 to 1/4, so can be stored compactly during storage and transportation. In addition, containers can be folded and assembled easily and quickly, and can be stacked in both folded and assembled states.

When did foldable shipping containers come to light?

Business establishments and freight and transport operators got so used to rigid shipping box containers that foldable containers never came to light until about 2008. Imagine flat-packing your empty shipping containers and stacking them when not in use or during transportation.

Enter The Foldable ContainerHow Does A Foldable Container Work?The Downside of Foldable ContainersWhile the containers from HCI are of the collapsible type, those from Staxxon fold vertically, in the company"s words "accordion style". To fold an HCI container, an MHE would lift the roof of the container, and then the sides are folded inward. The roof is then lowered gently to rest on the folded sides creating a kind of horizontal flat-pack. Fou...See more on marineinsight
