Thanks to the sensors built into the Smartflower, this solar panel opens and closes its petals to make the best use of the available Sun and can follow the Sun's course across the sky ...

The flower shaped solar panel array will automatically close when it senses rain or bad weather, and will automatically open back up after the weather passes by.

It isn't just another solar panel installation, but rather a token of respect for nature. Designed to mimic the behavior of a sunflower, it follows the sun throughout the day to maximize ...

This is how you can have your own photovoltaic flower in your garden by discarding the use of conventional solar panels, with an automatic and aesthetic system.

Users can purchase the system in porcelain white and pearl silver as the basic colour options, yet they also have choices to personalise it through colour selection or logo application.

Our architectural solar solutions mimic nature's perfect design, providing solar panels with sun tracking. Around the world, you'll find these solar panel flowers emerging as a new, clean energy solution that ...

Rooftop solar panel systems may need to be customized to account for several variables like roof type and space availability, but with the ground-mounted SmartFlower module, you have the ...

Smart solar flowers or Smartflower are large, mechanical bloom with solar panels for "petals." Some customers prefer this crafty invention over traditional rooftop panels.

Each flower uses "smart tracking" -- the solar panel petals slowly track the sun throughout the day and move to maximize solar energy absorption. This allows the system to collect ...
