The Sendai microgrid project demonstrated resilience by maintaining power for critical loads during the 2011 earthquake. Japan lost approximately 25% of its electricity supply post-Fukushima, leading to a ...

The 2011 Fukushima disaster fundamentally reshaped energy priorities, transforming this island nation into a global microgrid laboratory. But how exactly did catastrophe fuel technological ...

This microgrid community is a joint project between the city and Sekisui House, the Japan's leading house developer, with a research funding from the Ministry of Environment.

Honda, Toshiba, and Sekisui House (the biggest home builder in Japan) are partnering together to develop smart-home systems that consist of rooftop solar panels, a natural gas ...

The main current trends, reflected in the new revised Japanese energy policy following the Fukushima Daiichi nuclear accident, including the pilot projects in the country or carried out by ...

That's a common theme in Japan these days. After the disaster knocked out power to much of eastern Japan, smart microgrid projects from industrial to residential changed their approach.

Project Details: Commissioned March 2018 Size: 500kW/2.5MWh Use case: Microgrid, renewables support

Beyond Minamisoma, Fukushima Prefecture implemented policies promoting renewable energy projects in areas affected by the tsunami and nuclear fallout where there were high rates of abandoned...

Some microgrid systems are expected to appear that only PVs and battery storages in the local area manage to cover the electric demand in the area called as Utility microgrid. In Japan, ...

For over a decade an energy revolution has been underway in Japan, spurred on by the 2011 Great East Japan Earthquake and tsunami. Since then, microgrids have sprung up in their ...
