-----

New research emphasizes the importance of well-validated models and forecasting tools in evaluating choices for investments in clean energy technologies and policies by governments and ...

Taiwan-based E Formula Technologies Incorporated and Paraguay-based Quimfa SA signed a memorandum of understanding (MoU) to cooperate in the areas of energy storage, ...

At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

Paraguay, in partnership with Enex, is implementing new charging station for electric cars around the country.

A look at how AI can be used to help support the clean energy transition by helping to manage power grid operations, plan infrastructure investments, guide the development of novel ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, according to a new ...

Electric vehicles with Li-ion battery (BEV) could be built leveraging on the strategic advantages of natural resources from the Uyuni Salt Lake - Bolivia and the availability of electricity in ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed for crude oil ...

In recent months, different government institutions and energy companies have announced new measures and

launched initial projects. Here is an overview of the most relevant ...

The Decree sets out an energy policy plan for Paraguay with a long-term outlook until the year 2050, addressing the need for innovation considering current challenges in the energy sector (the New ...

As reported by Mobility Portal Latinoam&#233;rica, 13 years after the introduction of the first electric vehicle in the country, there is still no law governing charging infrastructure, delaying private investment in this ...

Investment firms PASH Global and ERIH Holdings have formed a joint venture (JV) to develop utility-scale solar and battery storage projects in Paraguay.

Business leaders from the three countries discussed Paraguay's hydroelectric energy surplus and potential opportunities for collaboration in the areas of green hydrogen, solar energy, smart electricity ...

The MIT-GE Vernova Climate and Energy Alliance, a five-year collaboration between MIT and GE Vernova, aims to accelerate the energy transition and scale new innovations.

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.
