NEBS Zone 4 Seismic Server Rack Cabinets are designed to withstand these harsh conditions and provide a robust, sturdy, and reliable solution for protecting servers and other valuable equipment.

Protect IT and server equipment with earthquake-resistant, durable, and stable racks. Explore customizable options designed for data centers and high-vibration environments.

Build to laugh in the face of an earthquake, these NEBS Certified server racks meet and exceed GR-63-CORE standards. From 42u to 48u, our seismic server racks and cabinets can hold their own against ...

Keeping electronics cool and enclosures pressurized while minimizing potential ignition sources are three critical factors to improve safety in hazardous locations by reducing explosion risk.

Constructed of 304 stainless steel with a weatherproof seal, customers must provide and run an air line to the explosion proof enclosure to ensure proper purging. The EPL-ASP.X-SS-36.24.12-6U-VW ...

We offer racks that meet Zone 4 seismic requirements for those located in earthquake inclined areas.

It is designed for secure, high density server and networking applications in IT environments that are earthquake prone or subject to regular vibration, such as an airport or factory.

It is a tall and wide explosion proof junction box with 48U spaces for additional equipment and increased cable management options for high density server and networking applications.

Explosion-proof server racks for gymnasiums located along the Belt and Road Initiative

Meet unique applications for server racks, storage, and networks with our custom built server enclosures. They are constructed with a welded, steel frame construction to provide dynamic weight ...
