Chinese EV battery maker CATL's new LFP batteries deliver higher energy density and longer cycle life.

This vehicle adopts the latest high-temperature resistant battery, eliminating the need for water cooling while offering a longer lifespan and enhanced safety. The swappable battery system is also flexibly ...

CATL announced it started mass production of fifth-generation lithium iron phosphate (LFP) batteries.

CATL has started mass production of its fifth-generation lithium iron phosphate (LFP) batteries, marking a new technological milestone in energy density and cycle life, according to Robin ...

CATL has announced the transition to mass production of its fifth-generation lithium iron phosphate (LFP) batteries. The new platform enhances specific energy and lifespan compared to its ...

CATL has begun mass production of its fifth-generation lithium iron phosphate (LFP) battery, a significant step forward in electric vehicle technology.

Announced in November 2025, this new generation promises substantial improvements in energy density, charging speed, and cycle life, spearheaded by the "Shenxing PLUS" model. The ...

CATL 5th-gen LFP batteries represent a transformative advancement in lithium iron phosphate technology, delivering unprecedented performance improvements that address ...

Contemporary Amperex Technology Co., Limited (CATL) has begun mass production of its fifth-generation lithium iron phosphate (LFP) batteries, marking significant improvements in both ...

Collaborations for "National Good Car": CATL is collaborating with JD-SW and GAC GROUP to launch the "National Good Car" utilizing the choco-swap battery system, indicating a ...

Fifth generation super lithium iron phosphate battery pack G
