EXAIR Cabinet Coolers are rugged industrial cooling systems designed to keep electrical and electronic control panels cool, clean, and reliable in hot or harsh environments.

These cabinets are designed with sealed structures, corrosion-resistant materials, and advanced thermal management systems that effectively regulate temperature and humidity within the enclosure.

Base Station cabinets to convert a mobile radio into a 120V desktop base station.

Thermoelectric cooler assemblies, which utilize thermoelectric coolers, are compact, efficient units that can control the temperature in mobile base stations and cell towers.

Constructed from galvanized or stainless steel, the enclosure features IP55/IP65 protection, internal mounting racks, and optional active cooling (fan or air conditioner).

SES-36 working fluid is retained as the best working fluid depending on its zero flammability, low boiling temperature, and thermal performance.

Shop high-quality base station cabinets for reliable communication. Durable, waterproof, and customized for your needs. Perfect for outdoor use. Buy now!

Whether it is extremely cold north or hot south of the border, from the coastal base station to the plateau room, it can guard the safety of communications equipment 24 hours a day, so that ...
