Freyr Battery has decided to abandon its plans for a \$2.6 billion lithium-ion battery plant in Coweta County, in the U.S. state of Georgia, which would have created more than 700 jobs.

A clean energy company is abandoning a plan to build a giant electric battery factory in Atlanta's suburbs after it shifted to buy a solar panel plant in Texas.

The reshoring and building of a domestic lithium battery supply chain is in full swing in the U.S., with a bevy of new EV battery manufacturing plants and factories coming online by 2026.

Within a few months, Hyundai and LG Energy Solution formed another JV to build a battery cell factory near Savannah, Georgia, that will support the production of 300,000 units of EVs...

Freyr Battery called off plans to build a \$2.57 billion battery cell manufacturing plant in Newnan, Georgia, saying the facility is no longer part of its "strategic goals," the Norway-based ...

Unfortunately, it looks like those plans are now dead. Freyr has announced that it is pulling the plug on the giant battery factory it had planned to build in Georgia, a \$2.6 billion factory...

Norwegian battery firm Freyr has canceled plans for a Georgia factory that would have supplied batteries for energy storage.

The company, incentivized by the Biden administration's Inflation Reduction Act tax credits and robust renewables growth, moved its headquarters from Norway to Georgia and ...

Freyr Battery announced it abandoned plans to build a battery factory in Coweta County, Georgia. The factory was announced in 2022, the first phase of which was expected to produce ...
