Deep in the mountains of Colorado, this fire lookout has been upfitted with solar panels to generate electricity from sunlight, which is then stored in batteries for use when needed.

Fire lookout towers and stations, including complexes of associated buildings and structures, watch for fire. Lookout cabins without towers are perched high and do not require further elevation to serve ...

Located on the National Bison Range, this 65" steel Aermotor tower and frame cabin, built in 1934, were gone by 1986. The tower functioned as both a fire lookout and wildlife observation point.

High Point: A problematic solar & propane-powered incinerating outhouse was repaired. A ground-to-cab intercom was acquired and installed so that lookouts could speak with visitors or staff members ...

It provides visual fire detection from the Northeast portion of San Diego County, to the deserts, across Riverside county, up into the San Bernardino and San Jacinto mountains and continuing all the way ...

High Point Lookout may need to be evacuated due to fire or other emergencies. All Fire Lookout Volunteers should be familiar with the procedure for evacuating their tower.

The first High Point lookout tower was constructed on the site in 1935 by the Civilian Conservation Corps for the US Forest Service. That tower was replaced by the current structure in 1964.

The lookout was originally named "Palomar Mountain", the name was changed to "High Point" sometime in the early 1960"s. It is being restored and staffed every day during fire season by the San Diego - ...

The original structure, a 20 foot tower with a small observation cabin and a residence ground cabin were built in 1922. The lookout was replaced by a frame cabin in 1934. The structure was destroyed in ...
