Is solar-powered lighting right for your yard?

"When it comes to yard-scapes, solar-powered lighting is ideal because I can achieve a beautifully-lit ambiance but with a lot less hassle," says designer Galey Alix of Galey Alix Design. "Solar-powered lighting means I'm not increasing anyone's electric bill nor do I have to bury hardwired lines around their property, which can get messy.

How do I choose the Best Lighting for my yard?

Before choosing just any one for your yard, start by asking yourself how much brightness you need and if the light needs to be direct or spread out. Solar pathway lights guide you when walking at night, while mounted spotlights may have security monitors or be intended to highlight landscape features.

Are outdoor solar lights a good idea?

By carefully mapping out your space, outdoor solar lights can make your yard or garden feel as comfortable as your indoor living areas. When surveying your exterior's square-footage, note any pathways that may benefit from better lighting. "Solar lights for lining walkways or driveways are fabulous for design and utility," Agárdy says.

Where should a solar panel be located?

The solar panel is low to the ground, so make sure it's in a sunny spot. Credit: The Spruce At night, they give our plants a magical glow. Credit: The Spruce Despite being our pick for the best decorative lights, these lights held up through tons of rain, storms, wind, and a heat dome.
