To maximise their own solar energy usage, they install an 8kWh battery storage system, allowing them to store excess solar energy during the day and use it during peak evening hours.

What Is Energy Storage? Advantages of Combining Storage and Solar Types of Energy Storage
Pumped-Storage Hydropower Electrochemical Storage Thermal Energy Storage Flywheel Storage
Compressed Air Storage Solar Fuels Virtual Storage
A flywheel is a heavy wheel attached to a rotating shaft. Expending energy can make the wheel turn faster. This energy can be extracted by attaching the wheel to an electrical generator, which uses electromagnetism to slow the wheel down and produce electricity. Although flywheels can quickly provide power, they can't store a lot of energy. See more on energy.gov glashaus.cc
