Designed to provide both visual appeal and robust protection, this solution is ideal for modern architectural projects. Whether for commercial or residential buildings, our system delivers a sleek, ...

You know how it goes - cities want solar energy but can't spare rooftop space. Enter photovoltaic curtain wall brackets, the unsung heroes turning glass facades into power plants.

Completed in March 2024, its curtain wall brackets generate 40% of the building's energy needs while withstanding Category 4 storm winds. Project lead engineer Maria Gutierrez explains: "We sort of ...

The Curtain Wall System is a modern, durable exterior cladding solution, designed to elevate the appearance and performance of both commercial and residential buildings.

Are curtain wall systems suitable for Qatar's weather conditions? Yes. Curtain walling with high-performance glass (double glazing, low-emissivity coatings), and good-quality sealants ...

A standard curtain wall offers no return on investment. In contrast, a photovoltaic curtain wall not only insulates the building but also generates power for over 30 years.

The VPV curtain wall consists of a piece of CdTe-based PV laminate glass, an air cavity, and a sheet of vacuum glazing. The solar cells are etched into strips by lasers, and the transmittance of the VPV ...

Unitized curtain wall systems are engineered to be fully assembled and glazed in the factory environment which provides dramatic improvements in quality and performance.

Along with aesthetics, the aluminum frame curtain walls is incredibly sturdy, strong and resists rust, a crucial factor considering Qatar's high humidity and coastal surroundings.

Designed with advanced insulation properties and efficient sun protection, our curtain walls help reduce
