What makes DCPC a successful data center in Indonesia?

Through extensive local expertise and a commitment to international standards, DCPC ensures that each project is future-ready from the ground up. Here are key insights from our project leadership team on building successful data centers in Indonesia:

Where is DCI JK6 located?

DCI Indonesia officially launched JK6 on 3 June 2025, our eighth data center, located at DCI - H1 Campus in Cibitung, West Java. With a capacity of 36 megawatts, JK6 is the largest single built data center in Indonesia.

What is the largest data center in Indonesia?

With a capacity of 36 megawatts, JK6 is the largest single built data center in Indonesia. This brings DCI's total capacity to 119 MW across 3 locations, and is a concrete response to Indonesia's growing demand for reliable, secure, and scalable digital infrastructure.

Why should you choose DCI Data Center in Indonesia?

DCI, as the market leader in data centers in Indonesia with a proven track record for over 10 years, are proud to serve this market segment with the reliable and scalable E1 data center.
