A partnership between Irish renewable energy group NTR and London-based Legal & General (L& G) has acquired a 211-megawatt (MW) hybrid solar and battery storage project in Louth ...

Norwegian energy company Statkraft has completed and energised a hybrid renewable energy project in County Offaly, Ireland, combining a 55.8 megawatt (MW) wind farm with a 20MW ...

We are investing up to EUR300m in the technology but are still just at the beginning of this journey: as part of our pathway to net zero, we plan to have multiples of our current battery storage, ...

The Project Financing Outlook for Global Energy Similar to other renewable energy projects, the addition of construction bridge debt provides an additional source of capital to pay construction costs, but also ...

Siemens Energy will deliver the first-ever hybrid grid stabilization and large-scale battery storage plant at Shannonbridge in Ireland. This is the first time, these two technologies have been ...

A partnership between Irish renewable energy group NTR and ...

It supports both hybrid and off-grid installation. With over 30 years of experience in global energy technology, Huawei is ready to assist Irish businesses in moving toward cleaner and sustainable ...

"A lot of energy storage has crept under the radar so far in Ireland," he told ESS News. Developers secure planning quite easily but the route to market is a challenge.

Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power. Today, in May 2022, we have 13 projects operating with a combined capacity ...

To assess the potential development pipeline for hybrid sites on the island of Ireland, we have produced

analysis of the existing and planned renewable connections in both IE and NI and then produced ...

Siemens Energy will provide the technology for a project in Ireland combining a synchronous condenser and a battery energy storage system (BESS) with a capacity of 160MWh.
