The Latvian Valley Power Energy Storage Equipment Transformation Tender represents a pivotal initiative in modernizing regional energy infrastructure. This project targets stakeholders in renewable ...

The first BESS projects are being implemented in Latvia and at Latvenergo production sites - starting with the smaller-scale BESS at Latvenergo AS CHPP-1 and continuing with larger ...

As we approach Q4 2025, industry watchers are keeping tabs on Latvia's first gigafactory for battery cells. When operational, it'll slash import costs by 60% and create 800+ skilled jobs.

The addition of two utility-scale battery energy storage systems (BESS) in Latvia marks the final milestone in synchronizing the Baltic power grids with continental Europe, according to the ...

In order to provide power reserves, with Decree No.674 of 24 September 2024, the Republic of Latvia's Cabinet of Ministers gave permission for AST to acquire, install and operate ...

Discover how Latvia's innovative energy storage initiatives are reshaping grid stability and renewable integration. This deep dive explores technical breakthroughs, market trends, and the strategic ...

Energy storage systems are an essential element of Latvia's path towards a sustainable and energy-independent future. The importance of these technologies is being recognized and ...

The delivery includes inverters and battery control equipment for a battery energy storage system (BESS), one of the most powerful in the European Union. The system, with a total ...

The most promising sectors for renewable energy equipment in Latvia are energy efficiency solutions, battery storage technologies, biomass power, wind energy, and energy produced ...
