After years of stop-and-go drafts, Mexico's Energy Regulatory Commission (CRE) finally published Resolution A/113/2024 in the Diario Oficial de la Federaci&#243;n on March 7, 2025.

The Ministry of Energy has been directed to issue a development plan for the electric sector (Plan de Desarrollo del Sector El&#233;ctrico) and to update it annually.

Following the recent energy reforms approved by the Mexican Congress, the new administration has outlined a vision of "energy sovereignty" and "energy justice". This report summarizes a high-level ...

Recently, the Mexican Ministry of Energy announced a new regulation mandating that all newly built wind and solar PV projects must be equipped with energy storage systems accounting for ...

To this end, it suggests continuing regulatory reviews, implementing policies to promote battery recycling, and adopting measures for the trade of used energy storage systems.

This reflects a significant commitment to strengthening Mexico's energy infrastructure, aimed at improving the stability and efficiency of the national electricity system, where battery ...

The White Paper on Energy Storage in Latin America and the Caribbean, published by the Latin American Energy Organization (OLADE), highlights Mexico's introduction of a ...

Future wind and solar energy projects in Mexico will be required to collocate battery energy storage systems equivalent to 30% of their capacity, a senior government official told the ...

While the government frames these reforms around goals of sustainability and energy security, the shift raises concerns among private and foreign stakeholders about regulatory ...
