XENDEE is the team and technology supporting distributed energy and microgrid energy solutions. It is a comprehensive distributed energy resource (DER) design and operation software platform. Its ...

Renewables-based microgrids and peer-to-peer (P2P) energy trading can boost energy security as they are self-sufficient and run independent of large grids.

The project focuses on assessing local contexts to facilitate mini-grid development in Zambia and identifying electrification opportunities in areas such as irrigation, agro-processing, and ...

Dutch cyclists rode down the world's first bike path made entirely of discarded plastic this week, in a move aimed at reducing the millions of tonnes wasted every year.

Local communities generating their own power could become 90% energy self-sufficient, with potential to be fully self-reliant in the future, according to a Dutch study.

The World Bank's Energy Sector Management Assistance Program (ESMAP) and the Africa Mini Grid Developers Association (AMDA), with support from the Common Market for Eastern and Southern ...

Pacific small island states, contributing only 0.03% of global emissions, are leading with ambitious renewable energy projects and net-zero goals by 2050.

Microgrids can step in when the main electricity grid fails. And as they can be powered by renewables, they are a sustainable and affordable option, too.

The report, unveiled during the 8th Minigrid Action Learning Event in Lusaka, Zambia, highlights minigrid growth, challenges, and opportunities, and serves as a valuable resource for ...

Can microgrids enable macro development? Lusaka, Zambia - Standing in the bustling peri-urban settlement

Microgrid development lusaka

of Ngwerere, where nearly 1,000 Zambians live on the outskirts of Lusaka, you can see ...

Microgrid systems offer a sustainable solution to the energy challenges faced by rural Africa. By harnessing renewable resources, these systems provide reliable and localized energy, ...

On November 18th, SANY Group successfully held the "SANY Green Mine Microgrid Solution Global Launch Event" in Lusaka, Zambia.

A few years ago, the village of Ngwerere plunged into darkness at sunset. But thanks to a solar powered microgrid that supplies 150 households and small businesses with renewable electricity, the area has ...

Battery energy storage systems can address the challenge of intermittent renewable energy. But innovative financial models are needed to encourage deployment.

Tennessee's Chattanooga Metropolitan Airport recently became the first U.S. airport powered by 100 percent solar energy. Started in 2010, the \$10 million microgrid project includes a ...

Ngwerere is an area on the outskirts of Lusaka, just out of reach of critical municipal services. The community now has power thanks to a mini-grid installed by Standard Microgrid, which can support ...
