Learn about ETAP Microgrid, an integrated solution used to efficiently evaluate and optimize microgrid systems. The solution enables simulation and hardware-in-the-loop testing for microgrid systems ...

Our dedicated microgrid lab allows us to create configurable, multi-asset systems to test and validate our designs for varying applications. With more than 500 distributor facilities and 9,000 dealer ...

Always at the cusp of innovation, our solutions test the systems required for any level of microgrid control, whether through real-time or accelerated simulation.

Our services cover a wide range of microgrid systems, including standalone, behind the meter and those that are a part of a power purchase agreement. We leverage our extensive expertise in electrical ...

GridNXT is also designed to facilitate testing and demonstration of advanced grid management systems and has dedicated space available for testing complete microgrid systems (with custom programmed ...

Test wide range of grid-tied products, low to high. Simultaneous AC and DC operation per phase AND automatic switching of outputs provides extensive flexibility. Embedded Real-Time Remote Control ...

Renting a microgrid load bank from Ampere Development is the flexible, cost-effective way to test your distributed energy systems without the burden of ownership. Our rental program delivers reliability, ...

With many of the industry's most challenging microgrid projects under our belt, we have a unique understanding of the various types of technology and equipment to consider for your microgrid.

NLR collaborated with Caterpillar to test a prototype utility-scale energy storage inverter and microgrid controller. Microgrid operation was validated in a power hardware-in-the-loop ...

Maximize energy resiliency, efficiency, and security with the industry's leading microgrid control solutions.

Microgrid test equipment provider

SEL is the global leader in microgrid control systems, verified by rigorous independent ...
