Ambitious collaboration between companies and research institutes for large-scale production of circular integrated solar cells and panels from the Netherlands.

It aims to build up a strong PV cell and module manufacturing industry in the Netherlands and is financed publicly and privately. The energy transition must accelerate and become more ...

The energy transition must accelerate and become more efficient if the Netherlands wants to achieve its climate goals in 2050 and be climate neutral. The new Dutch program SolarNL, ...

Use this easy Rooftop Scan to quickly find out if your roof is suitable for solar panels and how much you could possibly save on your electricity bill. Design a detailed PV system for any ...

The MCPV project is designed to significantly elevate Europe's collective capacity within the solar industry and related supply chains, utilising advanced digital manufacturing technologies, ...

The SolarNL project is an ambitious collaboration between companies and research organizations for the development and large-scale production of circular integrated solar cells and panels in the ...

This collaborative effort is set to fast-track the Netherlands towards achieving its climate goals by 2050, aiming for climate neutrality with a production volume target of over 7 GWp/year of ...

Solar power in the Netherlands has an installed capacity of around 23,904 megawatt (MW) of photovoltaics as of the end of 2023. Around 4,304 MW of new capacity was installed during 2023.

The Dutch government has decided to discontinue the funding of SolarNL, a domestic solar manufacturing programme.

SolarNL helps to create the necessary innovative PV technologies and industrial basis in the Netherlands for

Netherlands solar Module Project

decades to come. With this program we are building a strong PV industry that ...
