In December 2020, DOE released the ESGC Roadmap, the Department's first comprehensive energy storage strategy to develop and domestically manufacture energy storage technologies that can ...

Additionally, this study highlights critical research directions and technological advancements that can potentially transform the energy storage sector in the years ahead.

US energy storage installations reached new heights with 5.3 GW installed and positive five-year growth projections. Delivered quarterly, the US Energy Storage Monitor from the American ...

Regional dynamics demonstrate energy storage markets reaching maturity. Explore this evolution and our analysis of the key global themes to watch in the year ahead.

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory ...

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

Energy storage is expected to play a significant role in enabling the global data centre build-out, although the commercial and financing models developers will use are evolving, Energy ...

The battery energy storage market continues its rapid growth, reshaping power systems worldwide. After a historic 2025, when global BESS capacity surpassed 250 GW and overtook ...

EPRI's the original Energy Storage Roadmap and current Battery Energy Storage Roadmap were developed using the process shown below: Originally published in 2020, EPRI's ...

Such approaches, from batteries to gravity, are developing rapidly and in many different directions. The pieces

New Energy Storage System Direction

below sample the richness and complexity of this important topic.
