At a utility scale, energy generated during periods of low demand can be released during peak load periods. The first utility-scale CAES project was in the Huntorf power plant in Elsfleth, Germany, and is still operational as of 2024 . The Huntorf plant was initially developed as a loa...

Large-scale power storage equipment for leveling the unstable output of renewable energy has been expected to spread in order to reduce CO<sub>2</sub> emissions. The compressed air energy storage system ...
