These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells -- with optional diesel redundancy when regulatory or client requirements demand it.

MEOX hybrid Off Grid Container Power Systems, built on the core framework of hybrid solar container systems for remote areas, combine DC coupling, VSG grid-forming, and intelligent EMS to maximize energy ...

A high-capacity, 2 megawatt-hour battery energy storage system integrated into a standard 40ft container. Designed for large-scale renewable integration, peak shaving, and grid stabilization, ...

These self-contained units, often housed in shipping containers, are equipped with advanced battery technologies like lithium-ion or flow batteries, making them ideal for powering a variety of off-grid ...

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in ...

Orenco's AdvanTex technology has provided a reliable, energy-efficient alternative for wastewater treatment in some of the world's most remote places. The AdvanTex AX-Mobile is Orenco's most portable treatment plant ...

In an era where energy resilience and sustainability are more critical than ever, the Mobile Solar Power Container is emerging as an intelligent solution that integrates mobility, clean energy generation, and ...

All-encompassing, fast, and resilient solution for disaster preparedness. A ready-to-install 2-3 kVA power module with 4-6 solar panels and lithium battery storage. Our turnkey water module is a water purification ...

Off-grid mobile energy storage container for wastewater treatment plants in Indonesia

The system integrates solar energy, pumped storage, and hydroelectric generation while enabling reclaimed water use for gravity-fed irrigation. After optimizing the operational algorithm, the system functions ...

Distributed Energy Resources or "DER," are the backbone of a microgrid. Think of solar panels, storage, or back-up generators. A key benefit offered by multiple DER is operational and economic flexibility.
