With a colossal storage capacity, cutting-edge safety features, and state-of-the-art engineering, FSO Asia is a testament to modern maritime innovation and offshore energy logistics.

Our Subsea Oil Storage system can be used to replace floating storage and offloading units (FSO/FSU), other subsea storage solutions, or an export pipeline. The modular design can be customized to fit ...

The real kicker? They're still importing 88% of their energy needs as of 2024. That's where Japanese energy storage containers come in - these modular powerhouses are quietly rewriting the rules of ...

Home - Products - Energy - Oil and Gas Production Plants - Oil Storage Barges: Kamigoto National Oil Stockpiling Site

The present work reviews energy storage systems with a potential for offshore environments and discusses the opportunities for their deployment.

The Keiyo Sea Berth, located 7km offshore in Tokyo Bay, was built as a joint project by Fuji Oil and three other oil refining companies in the area. The sea berth can accommodate two large 300,000 ...

The demonstration project will involve installing a container-type data center, solar power generation equipment, and battery energy storage systems on a mini-float.

But here's the kicker: modern offshore rigs are becoming accidental pioneers in energy storage system deployment. With 24/7 power needs and growing environmental regulations, ...

Utilizing our experience in the construction of jack-up rigs and offshore structures, we are proud to be the only company in Japan to build SEP (Self-Elevating Platform) vessel.

## Oil platform using 120-foot Japanese energy storage containers

Integration of an offshore storage system into an oil and gas platform. ESS are currently not widely deployed offshore. The state of the art related to offshore assets shows limited results, ...
