Probably in another flashy move to come out of the shadow of ambition, China has stunned the energy world by unleashing a fleet of power plants in the shape of a giant panda.

In addition to providing clean electricity, the panda solar stations are part of an effort to promote sustainable development among China's young people. A youth activity center at the Panda Power Plant targeted at ...

Not only is the panda-shaped solar farm adorable, it's also projected to reduce 2.74 million tons of carbon dioxide emissions over a period of 25 years, according to Panda Green Energy, a Hong Kong-based ...

With great power comes great fun! At least that's the catchphrase with China at the moment, what with their latest solar panel installations in Datong being a token of insane cuteness.

Ada Li Yan-tung creates panda-shaped solar farms to engage ...

Li Entong, a 17-year-old Chinese girl studying in the United States, came up with the idea after she attended the UN Climate Change Conference in Paris in 2015.

Ada Li Yan-tung creates panda-shaped solar farms to engage Gen Z in renewable energy. Like many teens, Ada Li Yan-tung loves watching panda videos on Instagram and .

One day in 2015, a 15-year-old girl named Ada Li Yan-tung came with an innovative idea of involving me in the solar energy industry. She shared her vision about me at a youth climate conference and explained how I ...

Located in Datong, a city in the province of Shanxi, northern China, the adorable setup consists of two types of solar panels. White thin film photovoltaic (PV) cells make up the bulk of the...

Over the next five years, as part of President Xi Jinping's 21st-century Maritime Silk Road economic policy, Panda Green Energy will install multiple power plants across the country disguised...

Panda Solar Power Station Girl

A cool video has emerged from China of the panda-shaped solar power station. The aerial footage, filmed in Datong, Shanxi Province on July 24, shows the solar panels placed to form the shapes of giant pandas.
