Why should you buy an electric car in PNG?

Shi notes that in addition to greatly reducing carbon footprint, the operational and servicing costs are greatly reduced with EVs. Electric cars do not have clutches, gearboxes and oil filters that constantly require replacement in the challenging PNG environment.

Does Papua New Guinea have electricity?

In Papua New Guinea where rugged terrain, extreme weather and political disputes contribute to low levels of electrification, only 13% of the population have reliable access to electricity, and most of those live in the urban centres connected to the grid.

Will PNG get 50 per cent of its fleet to EVs?

Managing Director and majority owner, Leon Shi, says the company plans to help the PNG government towards its stated aim of converting 50 per cent of its fleet to EVs by 2030. "We have had EVs in the country since January," says Shi. "We have an MG ZS that has been driving out into Central Province every day since January.

Are EVs a problem in PNG?

There are some terrible potholes on that road and that car has been doing absolutely fine." Another concern for EVs in PNG is the uncertainty of the power grid. "There were concerns over the effect of the power surges," says Shi. "But we have not had any problems so far.
