---

The United States solar + storage industry is experiencing growth and innovation in some segments but stagnation in others as it enters a new year. Both small- and large-scale energy ...

Solar and batteries will dominate US power plant construction in 2025. Explore the trends shaping our energy future today!

Energy storage systems, mostly large batteries, are important because they help store solar and wind power for use when the sun isn't shining or the wind isn't blowing. In 2025, over 31 ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

Dozens of large-scale solar, wind, and storage projects will come online worldwide in 2025, representing several gigawatts of new capacity. The Oasis de Atacama in Chile will be the ...

Many utilities have embraced gas, or promoted restarting closed coal or nuclear plants, but that overlooks the cheapest and fastest-to-build option - solar energy combined with battery ...

In October 2024, EIA reported that battery storage capacity was expanding rapidly in the U.S., and that trend is also expected to continue into 2025.

In homes, schools, hospitals, and shelters, solar and storage are delivering real cost savings and greater energy resilience to every corner of the country. Here are the top 25 solar and ...

The U.S. Department of Energy's Energy Information Administration (EIA) forecasts 32.5 GW ac of utility-scale solar capacity and just over 18 GW of energy storage will be deployed in 2025. ...
