Learn about PV module testing and how it ensures the reliability and efficiency of solar panels. Discover the importance of rigorous testing for sustainable energy solutions.

Conduct PV testing of your solar modules and components at our accredited photovoltaic testing laboratory. Solar certification services available.

We offer PV laboratory qualification according to ISO/IEC 17025, which comprises verification of scope and accreditations, testing structure and laboratory layout, operations and maintenance requirements.

Enertis Applus+ PV Mobile Laboratory is a solar laboratory that brings the most accurate solar testing and solar inspection techniques for solar PV modules directly on-site at solar plants, minimizing ...

Our state-of-the-art PV testing laboratories provide product services for performance verification across a range of climates and conditions. Testing services for development, pre-production and production ...

SITARC offers integrated testing and inspection services for your PV modules and solar system components, guiding you through every step of the process. We help businesses optimize their ...

DNV is accredited as a testing laboratory under ISO 17025 by ENAC. We have been carrying out tests under a multitude of international standards in the renewable sector for over 35 years, making it clear ...

Our photovoltaic performance laboratory testing services for solar panel products provides independent verification of warranty claims, endurance, output, and functionality in a variety of climate or conditions.

From photovoltaic (PV) modules to custom testing, Alfa Chemistry is your one-stop laboratory for performing photovoltaics analysis.

Photovoltaic panel testing laboratory work

Wide range of independent in-house laboratory testing services done by our specialized and experienced team, providing quick and reliable analysis of your solar panels
