Which country exports the most solar panels to the EU?

As Fatih Birol, the executive director of the IEA, was quoted by The Guardian as saying, "If I could sum this [trend] up in two words they would be: China, solar." China is by far the largest exporter of solar panels to the European Union, accounting for 98% of all EU imports in 2023, new data from Eurostat has shown.

What is the EU export value of solar panels?

By contrast, the EU export value of wind turbines (EUR2.8 billion) was much higher than the corresponding value for imports. The EU import value of solar panels decreased by 43% between 2023 and 2024 (see Figure 2), due to a drop in prices, even though the quantity imported slightly increased by +2%.

Which EU country imports the most solar panels in 2023?

China is by far the largest exporter of solar panels to the European Union, accounting for 98% of all EU imports in 2023, new data from Eurostat has shown. The EU imported EUR19.7 billion worth of solar panels from extra-EU countries last year, with imports of solar panels up 5% in volume terms, but down 12% in value terms due to lower prices.

What is the EU export value of solar panels & biofuels in 2024?

The EU import values of solar panels and liquid biofuels in 2024 were much higher than the corresponding EU export values which were EUR0.7 billion for solar panels and EUR1.8 billion for liquid biofuels. By contrast, the EU export value of wind turbines (EUR2.8 billion) was much higher than the corresponding value for imports.

In two years, the European installed solar PV capacity has been multiplied by two.1 On the other hand, the remaining European manufacturers of solar PV panels are dying: in August 2023, ...

The production volume of electricity from solar photovoltaic power in the European Union has been steadily increasing in the last years. In 2024, the EU's solar PV power production stood at ...

The EU imported EUR19.7 billion worth of solar photovoltaic panels from China in 2023. In 2023, the EU imported EUR19.7 billion worth of solar panels, EUR3.9 ...

# Photovoltaic solar panels exported to Europe

Why Europe's Solar Market Is at a Crossroads in 2025 With China's export VAT rebate for photovoltaic products dropping from 13% to 9% effective December 2024, European importers are ...

Over the last years, the EU has taken initiatives to strengthen its support to the European solar PV manufacturing sector, which includes several globally competitive companies in several ...

The EU imported EUR19.7 billion worth of solar photovoltaic panels from China in 2023. In 2023, the EU imported EUR19.7 billion worth of solar panels, EUR3.9 billion of liquid biofuels, and EUR0.3 ...

In the context of the European Green Deal, analyzing the EU trade in green energy products is crucial for understanding geopolitical dependencies, assessing energy security, and ...

The Solar Stewardship Initiative (SSI) has adopted a new set of binding targets and reporting requirements for its PV manufacturing members.

Credit: SolarPower Europe Europe imported around 33GW of solar PV modules from China in the first four months of 2024, representing 43% of total Chinese module exports, according to US energy ...

As Europe accelerates its transition to renewable energy, solar power has emerged as a cornerstone of this transformation. However, a significant challenge persists: the majority of solar panels installed ...

China is by far the largest exporter of solar panels to the European Union, accounting for 98% of all EU imports in 2023, new data from Eurostat has shown.
