---

Average battery pack prices were lowest in China, at \$84/kWh. Pack prices in the North America and Europe were 44% and 56% higher, reflecting higher local production costs and greater ...

Battery pack prices for stationary storage fell to \$70/kWh in 2025, a 45% drop from 2024, making it the cheapest lithium-ion category for the first time, according to BloombergNEF (BNEF).

BloombergNEF's 2025 survey finds average lithium-ion pack prices dropped 8% to \$108/kWh, driven by LFP adoption, overcapacity, and competition. Stationary storage costs plunged ...

That survey encompasses batteries used for a range of e-mobility applications as well as stationary energy storage. BNEF found that, due in part to a widespread shift to lower-cost lithium ...

The price of battery packs has decreased by 75 percent in the last 10 years, as this energy storage technology has become increasingly important in the electric mobility and renewable...

Lithium-ion battery pack prices fell 20% in 2024 to \$115/kWh. Discover what this means for EVs, battery energy storage systems, and commercial & industrial energy storage.

Up-to-date lithium battery cost guide with a detailed USD/Wh table: wholesale pack averages, and retail examples (EcoFlow, BLUETTI, Jackery, UDPOWER). Learn what drives \$/Wh ...

Average LFP battery pack prices across all segments came in at \$81/kWh while nickel manganese cobalt (NMC) packs were at \$128/kWh. The report also covers regional differences in ...

The price of Lithium Iron Phosphate (LFP) battery cells for stationary energy storage applications has dropped to around \$40/kWh in Chinese domestic markets as of November 2025. ...

# Price of energy storage lithium battery pack

The data includes an annual average and quarterly average prices of different lithium-ion battery chemistries commonly used in electric vehicles and renewable energy storage.
