The data includes an annual average and quarterly average prices of different lithium-ion battery chemistries commonly used in electric vehicles and renewable energy storage.

Read more about why you should track lithium commodity prices daily with Fastmarkets' benchmark lithium prices. Find out more about our lithium price data and view regularly updated lithium price ...

In 2024, the average global prices of lithium-ion batteries dropped by 20%, reaching \$115 per kWh. For electric vehicle batteries, the price fell below \$100 per kWh. Why Are Lithium Battery ...

Average lithium-ion battery pack costs fell 8% to \$108/kWh in 2025, a 93% drop since 2010. China leads at \$84/kWh with LFP, while stationary storage packs hit benchmark lows of ...

Drawing on recent auction results from Saudi Arabia, India and Italy, along with in-depth interviews with project developers, suppliers and analysts across global markets, it captures the most ...

Lithium-ion battery pack prices fell to a record \$108/kWh in 2025, fueled by LFP adoption and global competition.

According to BNEF, battery pack prices for stationary storage fell to \$70/kWh in 2025, a 45% decrease from 2024. This represents the steepest decline among all lithium-ion battery use ...

That survey encompasses batteries used for a range of e-mobility applications as well as stationary energy storage. BNEF found that, due in part to a widespread shift to lower-cost lithium ...

Over recent years, high-scale production and capital investment into the battery production process have made lithium-ion battery packs cheaper and more efficient.

Price of lithium-ion batteries for energy storage modules

New York, December 9, 2025 - lithium-ion battery pack prices have dropped 8% since 2024 to a record low of \$108 per kilowatt-hour, according to latest analysis by research provider BloombergNEF (BNEF).
