Our solar procurement solutions are a trusted source for PV manufacturers and project developers seeking to reduce costs through supply optimization.

With the increasing adaption of renewable energy systems onsite, designed to feed site loads, there is a critical need to develop tools that allow the federal sector to become a mature and sophisticated ...

PPAs are a great fit for large, creditworthy companies with stable energy needs, especially in power-intensive industries like tech, manufacturing, and mining. These sectors have a ...

In this study, we propose an optimal procurement auction scheme for PV long-term contracts using the two-dimensional auction model in which the energy buyer makes contracts for a ...

Here, we quantify the theoretical global power generation of PV systems sited on mining lands and evaluate their potential contribution to decarbonization.

The global mining industry will remain a large contributor to global value chains, and mining procurement spend will only increase in the coming years. As such, we need to understand the impact and ...

Explore the integration of photovoltaic systems in the mining industry. Discover how solar energy adoption is transforming mining operations by reducing environmental impact, enhancing ...

Guidelines for Tariff Based Competitive Bidding Process for Procurement of Power from Grid Connected Solar PV Power Projects (28th July, 2023)

Achieve energy independence anywhere with our Solar Power and Energy Storage Solutions, with capacities ranging from 50 kW to 10 MW. The global demand for electricity is rising fast. Power grids ...

Procurement of 10kW pv distribution for mining

We assess global open-pit mining sites as potential solar hubs, analysing their technical feasibility and deployment timelines under diverse future scenarios.
