o The percentage of electricity generated by fossil fuels in the United States dropped from 67% in 2015 to 58% in 2024, while the percentage of electricity generated by renewable energy sources ...

Find up-to-date statistics and facts on the solar photovoltaic industry in the United States.

In Q3 2025, the residential segment installed 1,088 MWdc of solar capacity, declining 4% year-over-year and quarter-over-quarter. Despite an industry rush to bring projects online this year to qualify for tax ...

Summary: This article explores the growing role of photovoltaic panels across industries, backed by installation data and efficiency trends. Learn how solar adoption is reshaping energy strategies globally while discovering ...

Share of electricity production from solar, 2025 Measured as a percentage of total electricity produced in the country or region.

Solar's share of U.S. electricity generation has risen from less than 0.1% in 2010 to over 8% today. Solar has grown to play an increasing role in many states, now making up more than 20% of electricity production in ...

Solar energy can be harnessed two primary ways: photovoltaics (PVs) are semiconductors that generate electricity directly from sunlight, while solar thermal technologies use sunlight to heat water for domestic ...

We are pleased to announce the release of the latest edition of Berkeley Lab's Tracking the Sun annual report, describing trends for distributed solar photovoltaic (PV) systems in the United States, ...

3.2 million US homes have solar panels installed. 3,975,096 people are employed in the solar industry worldwide, and 263,883 of these are in the United States. The solar energy industry created more ...
