In a significant move toward energy independence and climate resilience, Saint Lucia is preparing to launch its second industrial-scale solar project--a 10 MW photovoltaic installation paired with a 26 MWh ...

But for some of the almost 200,000 people that live on the island, another incredible resource is affecting their daily lives -- the nearly 15,000 solar panels that are producing clean, reliable,...

On the 11th April 2018, the St. Lucia Electricity Services Limited (LUCELEC) - the sole electric utility company on the island - completed the commissioning of the island's first utility-scale solar PV plant.

To encourage clean energy adoption, Saint Lucia has implemented several temporary incentives. Solar PV systems benefit from exemptions from import duties and Value Added Tax (VAT), while electric ...

The island country in the eastern Caribbean is preparing to host a 3 MW solar PV plant, its first utility-scale renewable energy project.

LUCELEC is pleased to announce its intention to proceed with a second utility scale solar PV project which will include a battery energy storage system (BESS). The project is currently planned as follows:

As the first utility-scale solar project in Saint Lucia, it is expected to pave the way for more renewable energy projects in the future. Understanding the basics of solar panel manufacturing helps ...

Once completed and operational, the 10 MW solar farm will provide clean, reliable, and sustainable energy to power homes and businesses across Saint Lucia, marking a new chapter in the ...

St Lucia Electricity Services (LUCELEC) plans to tender a 10 MW solar plus storage project in St Lucia. According to an announcement released by the company, the facility will be the island's second ...
