The Solar Chapter contains statistics on installed capacity and number of grid-connected solar PV systems.

Currently, renewables account for about 5% of Singapore's total electricity generation, with solar power being the main contributor. Singapore has set an ambitious target to increase its ...

The latest market data analysis reveals that this surge is due to the country's efforts in boosting renewable imports alongside accelerating local solar power production.

SINGAPORE - Singapore boosted the share of renewables in its power generation mix to a record high in May, an analysis of the latest market data showed, as the country ramped up ...

Solar energy is one of the main sources of renewable energy in Singapore, accounting for about 5 of the country's total electricity generation. Singapore's solar deployment has grown ...

In May 2025, Singapore hit a record-high 2.58% share of renewables in its power mix, thanks to a sharp surge in domestic solar output (its strongest since March 2024) and its third ...

Singapore also increased its domestic solar energy production. Up to May 2025, the country's renewable energy made up 2.58% of all the electricity used. Solar power increased the ...

The results and insights presented in this paper offer useful recommendations to the researchers and policy makers in the field of solar electricity system in Singapore, and to study ...

NUMBER OF GRID-CONNECTED SOLAR PV INSTALLATIONS, Q1 2021 - Q1 2025 (AS AT END OF EACH QUARTER)
