This book provides a comprehensive survey on the available studies on control, management, and optimization strategies in AC and DC microgrids. It focuses on design of a laboratory-scale microgrid ...

This report covers the networked microgrid program efforts which were led by the Pacific Northwest National Laboratory (PNNL) in fiscal year (FY) 18 and 19 as part of the DOE microgrid program ...

The conventional electrical grid faces significant issues, which this paper aims to address one of most of them using a proposed prototype of a smart microgrid energy management system.

This paper presents the design of a smart microgrid with small-scale hydro generation. It is a practical case study with the integration of two grid-connected pico-hydro turbines: a low-head propeller ...

In this context the paper aims to present the initial stages of a modular system design for the smart microgrid lab platform, where the target technical specifications of the smart microgrid system are the ...

This report considers how the DOE can continue to support microgrid technologies in meeting these goals through improvement in microgrid planning and design tools (MPDT).

This research discusses about the design and execution of a direct current (DC) microgrid system that leverages Internet of Things (IoT) technology. The microgrid combines various green energy ...

Ò. Monés Pederzini, "Design of a Solar Microgrid for the Community of Mpage, Gabon based on its social and economic context," Universitat Politècnica de Catalunya, 2017.

This report captures and shares experiences and lessons from the Miramar assessment, conceptual design, solicitation, engineering design, and construction process as well as from other ...

Smart Microgrid Design Experiment Report

The Net-Zero Microgrid Program provides cross-cutting research to accelerate the use of renewable and zero-carbon generation in microgrids.
