---

The largest solar generation plus energy storage project ever to be built in the Caribbean has been announced by the Government of St. Kitts and Nevis, the state-owned St. Kitts Electric Company ...

My goal is to build a green economy by pursuing public-private partnerships (PPPs) to attract investments in factories to manufacture solar panels and other parts for the solar PV industry. These ...

Under the National Energy Policy, selected alternative energy equipment, including solar panels, hydrogen fuel cells, and low-energy lighting, has been approved for import duty and Customs Service ...

This profile provides a snapshot of the energy landscape of the Federation of St. Christopher (St. Kitts) and Nevis--two islands located in the Leeward Islands in the West Indies.

The honour was given in recognition of the island's photovoltaic desalination plant in Butlers, St. James--a facility that uses solar power to produce up to 60,000 gallons of treated water ...

The solar-powered facility, already integrated into the island's water distribution system, can produce up to 60,000 gallons of treated water per day, significantly boosting water security ...

Nevis was recognized as Best Energy Resilience Project at the 17th annual Caribbean Renewable Energy Forum (CREF 2025). The honour was given to the photovoltaic desalination plant ...

By promoting the adoption of solar PV, St. Kitts and Nevis can advance its climate mitigation goals while improving energy security and reducing the environmental impacts of energy production.

The solar farm is expected to supply over 30% of the island's electricity demand, significantly reducing the country's carbon footprint by cutting its dependence on fossil fuels and ...
