The NAICS code 221114 is described as Solar Electric Power Generation. It is part of the Electric Power Generation, Transmission and Distribution (2211) Industry Group, and part of the Utilities (22) Sector.

Solar power, also known as solar electricity, is the conversion of energy from sunlight into electricity, either directly using photovoltaics (PV) or indirectly using concentrated solar power.

This U.S. industry comprises establishments primarily engaged in operating solar electric power generation facilities. These facilities use energy from the sun to produce electric energy.

Students use SOLAR to register for classes, print schedules, view and pay bills, update personal contact information, view transcripts, and submit student employment timesheets.

NAICS 221114 - Solar Electric Power Generation encompasses the production, installation, and maintenance of solar photovoltaic (PV) power generation systems and related infrastructure.

Discover why rising electricity prices make solar a great investment in 2026, even after the 30% federal tax credit expires. We break down the long-term savings.
