Almost 70 gigawatts (GW) of new solar generating capacity projects are scheduled to come online in 2026 and 2027, which represents a 49% increase in U.S. solar operating capacity compared with ...

Longer term, the residential solar market will grow at an average annual rate of 7% between 2027 and 2030. Rising retail rates and declining solar costs will drive a recovery in customer-owned systems.

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

o In 2024, between 554 GW. dc. and 602 GW. dc. of PV were added globally, bringing the cumulative installed capacity to 2.2 TW. dc. o China continued to dominate the global market, representing ...

In this analysis, we examine the latest trends in installations, costs, and market dynamics, providing solar businesses, developers, and investors with a comprehensive picture of where the market is ...

Policymakers in some of the world's largest economies are reducing support for solar power generation. Even so, Goldman Sachs Research expects rapid growth in the sector, with global solar ...

With China implementing major changes to its solar market design this year, a temporary dip in global growth in 2026 appears very likely. Meanwhile, other regions are falling behind, particularly the Middle ...

Discover comprehensive insights into the global solar power market, including photovoltaic and thermal technologies, key players, pricing trends, sustainability impact, and market forecasts from 2024 to ...

India made significant strides in solar PV installations, adding 18 GW in 2022, marking an impressive 40% increase compared to 2021.

The global solar power market is projected to grow from \$253.69 billion in 2023 to \$436.36 billion by 2032,

at a CAGR of 6% in the forecast period
